PROFESSIONAL PROFILE

Results-driven Full Stack Developer with 5 years of experience designing and building scalable web platforms, CRMs, real-time communication systems, and AI-powered solutions. Started as an independent developer in 2021, delivering custom landing pages and internal management systems focused on inventory optimization, employee management, attendance tracking, payroll hours, overtime control, performance monitoring, and workforce analytics. Since 2023, working as a Full Stack Developer at IT Oeste, leading the development of real-time communication platforms, educational systems, and enterprise CRM solutions using Laravel, Vue.js, PHP, MySQL, WebSockets, Meta Graph API, and AI integrations. Specialized in building scalable backend architectures, responsive frontend interfaces, API integrations, and intelligent automation systems. Key achievements include developing AI-powered chat systems with real-time messaging, document and media sharing, operator ranking systems based on response times, analytics dashboards for student support performance, and moderation systems using regex-based shadow banning to enforce platform policies. Led the technical architecture and backend/frontend development of employment and CRM platforms, including Mercado Pago subscription integrations, email automation workflows, WhatsApp API integrations, webhook systems, polling services, and AI-driven sales automation using MCP-based solutions. Recently led the development of CRM platforms from scratch, integrating WhatsApp Business solutions through Meta Graph API, real-time communication systems, AI-powered sales assistants, and external API ecosystems for white-label enterprise products. Experienced in system architecture, database design, backend services, frontend development, and scalable integrations for high-demand business applications. Strong experience across the full software development lifecycle — from architecture and infrastructure planning to frontend development, backend services, real-time systems, AI automation, and production deployments. Passionate about building scalable products, solving complex technical challenges, and delivering high-impact solutions that improve operational efficiency and user experience.

TECHNICAL EXPERTISE

Languages:	PHP, PHP / Laravel, JavaScript / Vue.js, Python
Frameworks:	Laravel, Vue.js, Tailwind CSS, Bootstrap
Tools:	WebSockets (Pusher/Reverb), Git, Linux, MySQL
Integrations:	MercadoPago API, OpenAI ChatGPT API, REST APIs, GraphQL, Twilio API, MercadoPago Checkout API
